

## Drive Revenue

Do you want to streamline operations, enhance customer experience and increase revenue all at the same time? Cashless is the key to accomplishing it all.

Research shows that customers load more money on cards than they would spend with tokens. Additionally, you can easily promote spending by providing incentives, such as a "Buy \$50 and get \$10 Bonus" offer.

Currency added to cards can be used anywhere. Customers no longer make buying decisions with each play but spend more freely and have more fun. With a loaded card, any activity is accessible without making additional purchases. Now it's just swipe and play.

*Customers who use debit-style cards typically spend 15% more*

*Significant savings in operating costs*

## Flash Reader

Designed with redundancy for ultimate uptime, flexible options allow for tickets or ticketless. Reduce costs by going wireless. RFID offers a new level of customer experience with just a quick tap to play.

*Consistent performance  
for maximum reliability*

*Kiosks make it easier  
for customers to  
spend money*

## Self-Service Kiosk

The next generation of self-service transactions is here! Own the flexibility to customize your kiosk. Sell game cards, admission tickets, activities, even food and beverage.

## Access Control

Taking control of an entry point means preventing entry without proper credentials. Our ACE unit is fully customizable with flexibility of cash value or specific entry rights.

Customers can scan cashless cards, printed tickets, wristbands, or even smart phones for access.
