Online Store Open 24/7

Increase your revenue by being open on the web around the clock and allowing customers to book events on their schedule. Allow your customers to see all of their options and build their event in an easy to use web portal in the comfort of their own home.

Total Integration

Why use outside software when you can have one single system integrated solution? Online orders are conveniently stored in your on-site POS system in real time, eliminating double bookings. You also get one system that tracks everything from schedules to payments to reporting. The reservation rolls right into the POS when it's time to start the event, so there is no need to copy from one system to another.

Eliminate double bookings

Save on Labor

Accepting bookings and deposits around the clock will save on labor costs and reduce call-in bookings. Coordination between everyone involved is facilitated and all details are easily available. Schedules, individual event details, payments, and communication with customers is all available in one place. Some tasks are accomplished automatically, further saving time and providing a more consistent workflow.

Parties Made Easy

Do you find keeping up with all the event details overwhelming? Organize bookings, rooms, people, activities, game cards and deposits. Enjoy one simple process to manage all the details in the same transaction.

Stay Organized

Keep all the details coordinated. A color-coded schedule keeps parties on track with statuses including Scheduled, Deposit Made, Party Started, and Complete. Our system makes it easy to maximize room usage without overbooking. Each day you can print the entire calendar to give to employees, and make sure everything is fully prepared before guests arrive.

Online Integration

The POS software integrates seamlessly with IdealOne's online booking platform. Since everything is connected, it all updates in real time. That means you don't have to worry about double booking whether an event is booked in person, on the phone, or on the web - the system knows the exact availability.

Streamline your events

Booking Features

- Maximize room usage without overbooking
- Increase sales by offering add-on products
- Quotes and invoices
- Set available dates and resources
- Schedule a party room along with other attractions
- Color-coded schedule of party status
